# L'URITONNOIR

dry urinal [uritonnoir.com](http://uritonnoir.com)

## WHAT IS AN URITONNOIR?

A uritonnoir is a dry urinal. It is a hybridization of two everyday objects, a urinal and a funnel. This eco-designed device is used either in public spaces during festive events or in private gardens. L'Uritonnoir is an utensil filling a volume of straw (carbon) with urine (nitrogen) to obtain human manure. Once composted, it can be used as an amendment to your plants and vegetables.

## WHERE CAN WE USE IT ?

## HOW MANY URITONNOIRS DO WE NEED ?

$$\frac{\text{number of visits per day}}{60} = \frac{\text{number of uritonnoirs}}{6} = \frac{\text{number of straw bales}}{\text{number of uritonnoirs}}$$

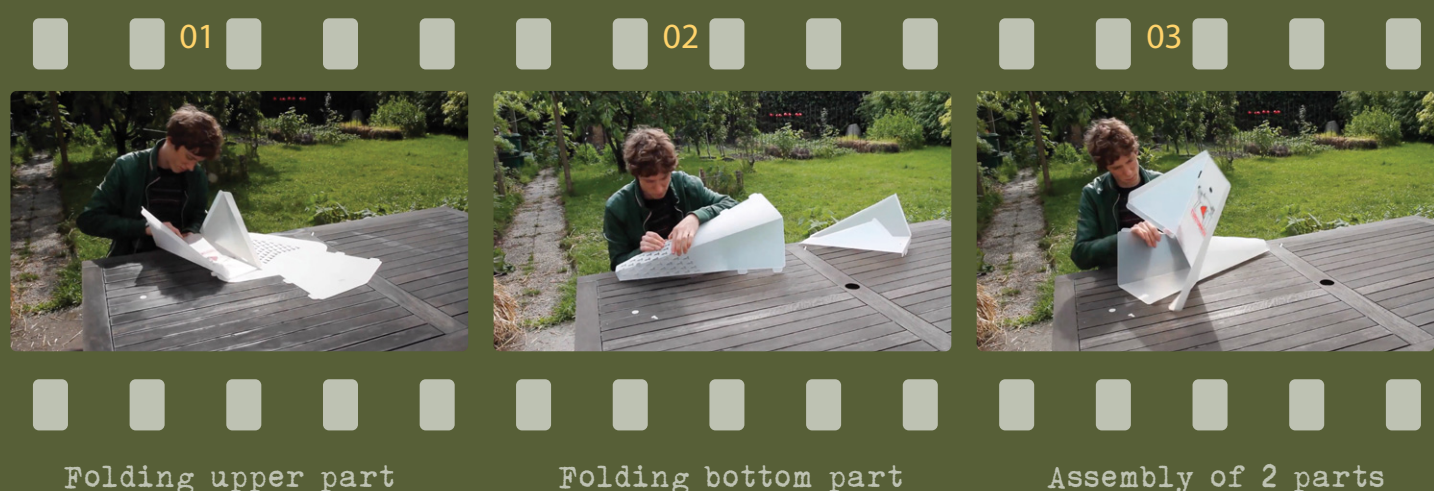

number of uritonnoirs

number of uritonnoirs

number of straw bales

Ø1.80m

## HOW TO ASSEMBLE ?

## HOW TO INSTALL IT ON STRAW BALES ?

Installing a uritonnoir (3 small straw bales)

Installing multiple uritonnoirs (straw bales)

## WHAT HAPPENS TO THE IMPREGNATED STRAW ?

## WHAT ARE THE CHARACTERISTICS OF A URITONNOIR?
